**IN THE SPECIFICATION:**

Please amend paragraph 26 of the Specification as follows.

[0026] The flooring group 18 includes the open metal floor grating 28 supported above a plenum 30 and return ducts 32 which fluidically communicate the plenum along its length. The plenum 30 is in open communication with the grating 28, and has acutely angled plenum walls 30w which extend the length of the dust testing chamber 12. The return ducts 32 run the length of the dust testing chamber 12 at the lowest point of the plenum walls 30w, and, as such, are positioned to optimally extract dust accumulation in the plenum 30 ~~from the~~, as will be understood from the operational description hereinbelow.
